

## **Enerjet chooses AFI KLM E&M for 737NG component support**

**Paris, Amstelveen, 16th April 2009 – Canadian charter airline Enerjet signed an exclusive 5 year component support contract with Air France Industries (AFI) and KLM Engineering & Maintenance (KLM E&M) covering maintenance and pool access for their growing fleet of 737NGs.**

The support will be offered by the joint Component Services Program (CSP) of Boeing and KLM E&M. The 737NG CSP Program provides fast access to critical parts. It offers Enerjet cost saving (up to 30%) on their component repair and inventory costs by providing access to a global pool of components. All components will be available for shipment within 24 hours of request. Enerjet can also replace a faulty unit quickly and easily with its own on-site inventory. Enerjet's aircraft are joining a global 737NG pool of about 200 aircraft and is thereby able to benefit from all the advantages of this dedicated OEM, MRO and Operator Program.

**Superior safety & reliability.** "We are very proud of the confidence Enerjet has shown in our MRO services by selecting us as their key strategic supply chain partner", said Rob Pruum, AFI KLM E&M Vice President Sales International. "Enerjet will benefit from AFI KLM E&M's experience, it's focus on on-time-performance and it's strong operational support. We will provide Enerjet the basis for a safe and reliable operation".

Gareth Davies, Enerjet Vice President Tech Ops said, "The support that we received from AFI-KLM during our start-up phase convinced us that this was a true partnership and not just a contract service. With AFI KLM E&M's depth of knowledge, support and overhaul capabilities we are in the position of being able to provide our customers with superior safety and reliability. We look forward to a long term relationship with AFI KLM E&M."

### **About Enerjet**

Enerjet is a privately held Canadian Corporation based in Calgary, Alberta. We fly Boeing 737-700 Next-Generation aircraft. In November 2008, Enerjet received its regulatory approvals from Transport Canada and the Canadian Transportation Agency to commence domestic and international charter flights. Enerjet is an equal opportunity employer and adhere to Canada's labor code and standards. For information regarding employment opportunities, charters or further background information, please visit [www.enerjet.ca](http://www.enerjet.ca).
